

INTRODUCTION AND OFFERINGS

Set up for success with Qubit3. Crafted with passion to bring innovation in the age-old software development sector which is complicated and expensive.

HOW WE STARTED

A serial entrepreneur and a couple of techies while working together on a project identified the gaps between the business needs and the tech offered, that's when Qubit3 was conceived to connect businesses and tech with ease and efficiency.

Qubit3 is a new-age tech company that aspires to become a leader in providing cutting edge customized software solutions to the techhungry world and making it simple for heavy tech and nontech companies to interact and build custom solutions for their business needs.

We believe in simplicity, efficiency, and affordability.

SERVICES OFFERED

WEB DEVELOPMENT

- WEBSITE DEVELOPMENT
- LMS/CRM DEVELOPMENT

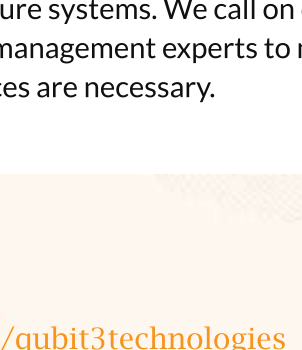

Web based applications and solutions are the backbone of today's fast moving world. We at Qubit3 live and breathe in this ecosystem. We provide individualized custom solutions ranging from basic web development to complex web applications for various use cases.

MOBILE DEVELOPMENT

- CUSTOM APPS
- BUSINESS APPS

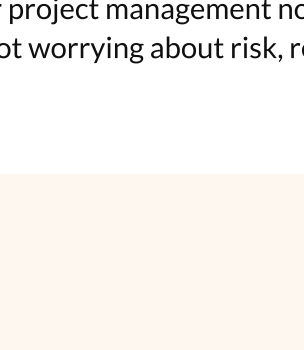

Without a mobile first approach, you're holding back your true growth potential. Qubit3 will ensure that companies of any size are mobile ready and it is available to your greatest assets, your valued clients and customers.

CLOUD DEVELOPMENT

- MIGRATIONS & DEV OPS
- CLOUD APPLICATIONS

Cloud based solutions are the unsung hero of profit, optimization and scalability. Reducing or removing dependence on traditional on-site I.T. infrastructure systems. We call on our team of cloud system creation and management experts to make it as easy as possible. Cloud services are necessary.

AGILE PROJECT MANAGEMENT

- PROJECT RESOURCES
- SCRUM MASTERS

Producing high quality projects/services is of utmost priority. We at Qubit3 carry awesome knowledge of scrum and agile methodology. You can leverage our project management now how to deliver successful projects by not worrying about risk, rework and cost.

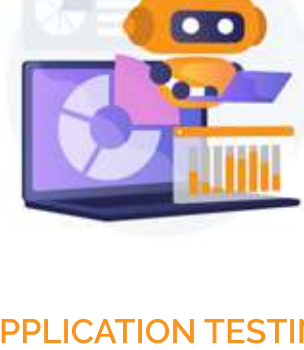

SERVICES OFFERED

BI (DATA VISUALIZATION, DATA ANALYTICS)

- DATA ANALYSIS
- DATA VISUALIZATION

Data and analytics is the blood of any business. It helps you to understand the metrics and identify the bottle necks. We at Qubit3 believe that every business should know how their business is perceived by looking at the critical customer data to provide state of the art custom data capture and management systems.

MACHINE LEARNING

- DATA PRE-PROCESSING
- PREDICTION AND FORECASTING
- DEEP LEARNING

Machine learning helps businesses to scale and learn using sophisticated algorithms to make sense in various virtual and real-time scenarios. Our data scientists help you develop sophisticated machine learning algorithms which will assist you in achieving your business goals.

AI (ARTIFICIAL INTELLIGENCE)

- NATURAL LANGUAGE PROCESSING
- COMPUTER VISION

The future is now. Artificial intelligence will dominate every business in every way. Once deployed, it will optimize and deliver results. Our team of brilliant artificial intelligence designers will get your business into the future. Customized AI will be the new normal.

APPLICATION TESTING

- AUTOMATION TESTING
- STABILITY TESTING

Application testing is the most critical part of project management as it has a direct impact on the end users. At Qubit3 we have native experience in testing software applications to ensure smooth functioning and bug-free execution.
